Epistemic communities represent networks of knowledge-based experts that help articulate cause-and-effect relationships of complex problems, define the self-interests of a state, or formulate specific policies for state decision makers. However, the role of these scientists and knowledgeable professionals in nuclear policy formulation is poorly understood.

Thoroughly documented and making excellent use of source material, *Politics and the Bomb* provides refreshingly new empirical evidence and theoretical analysis of the importance of scientists and experts behind the creation of new non-proliferation agreements. Simply not another book on nuclear proliferation, Sara Z. Kutchesfahani explores the differences in the emergence, composition, and influence mechanisms of the epistemic communities behind the nuclear non-proliferation policy formulation in Brazilian-Argentine Agency for Accounting and Control of Nuclear Materials (ABACC) and the Nunn-Lugar Cooperative Threat Reduction (CTR) Program.

In doing so she eloquently demonstrates how the role of these non-proliferation experts lead to the possibility of creating more effective non-proliferation policies in the future and hints at the need to sustain non-proliferation epistemic communities in all countries that can provide input to the global proliferation problem until it is solved.

The museum presents the breadth of Heyerdahl's life's work, from his first trip to Fatu Hiva, to the voyages with the Kon-Tiki, the Ra, the Ra II and the Tigris. British politics since 1945 Oppgaven handler om det som skjedde med Storbritannia etter 1945, The end of empire, the economy, Building a welfare state, The Thatcher.
